

Double Chamber K-Cup

At JJM we continue to discover new ways to deliver the best quality products and service. We have combined our industry knowledge and experience to push the edge of innovation. We strive to deliver new products, concepts, and techniques to help our client's brands achieve success and dominate the industry.

Double Chamber K-Cup Technology

- Allows for real ground coffee + creamer and/or sugar, flavoring, vitamins and minerals all in the same K-Cup.
- More than 90% solubility with most nutraceutical ingredients, including collagen and adaptogens.
- Precise individual dosing of coffee and added ingredient mix.

NEW INNOVATION:

Creamer, supplements, and flavoring powders placed in the lower chamber dissolve into freshly brewed coffee as they pass through.

Patent Pending, JJM

JJM'S DOUBLE CHAMBER K-CUP

can provide the most effective way to deliver your ingredients while using fresh coffee and tea. Call us today as we have limited space.
