

JJM PACKAGING CONTRACT PACKAGING

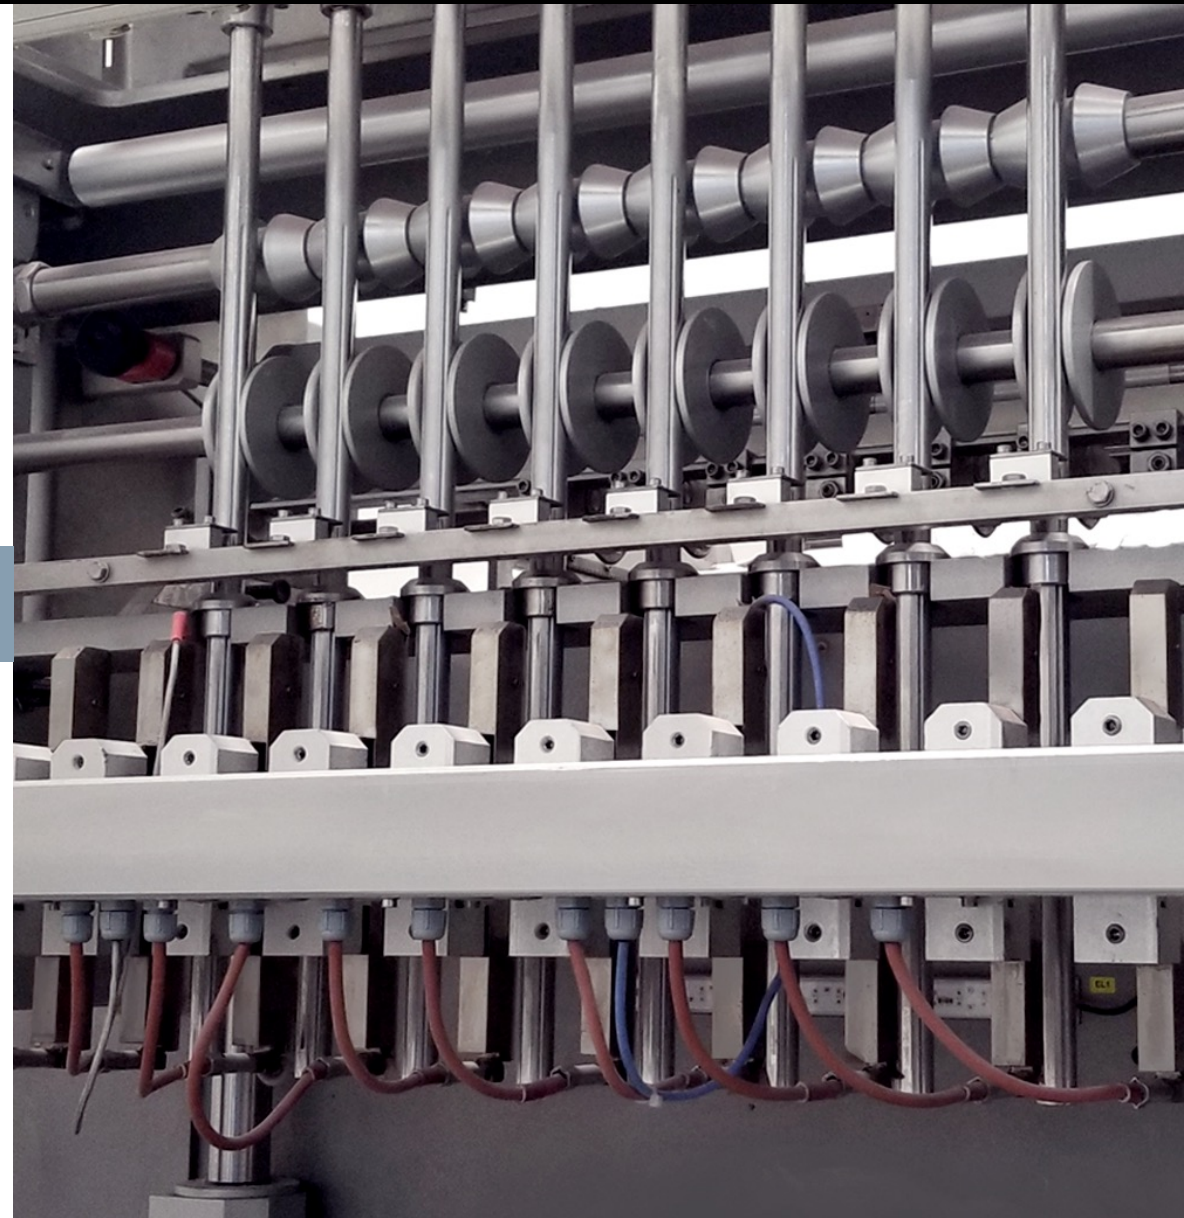

WHAT WE OFFER

JJM offers a turnkey solution.

We can formulate, source, blend and pack under one roof.

Specializing in flexible package forming and powder filling, JJM is on the cutting-edge of the packaging industry. We're dedicated to providing you with a full-service packaging solution that exceeds your expectations, from our new product formulation capabilities, state-of-the-art processing equipment to extensive product knowledge, and commitment to responsible manufacturing.

FORMULATING

We have the knowledge, experience, and capability to optimize formulation not only for taste and functionality but, also manufacturability.

After spending time learning about your product, we begin the process of researching and contacting suppliers to find exactly what you need.

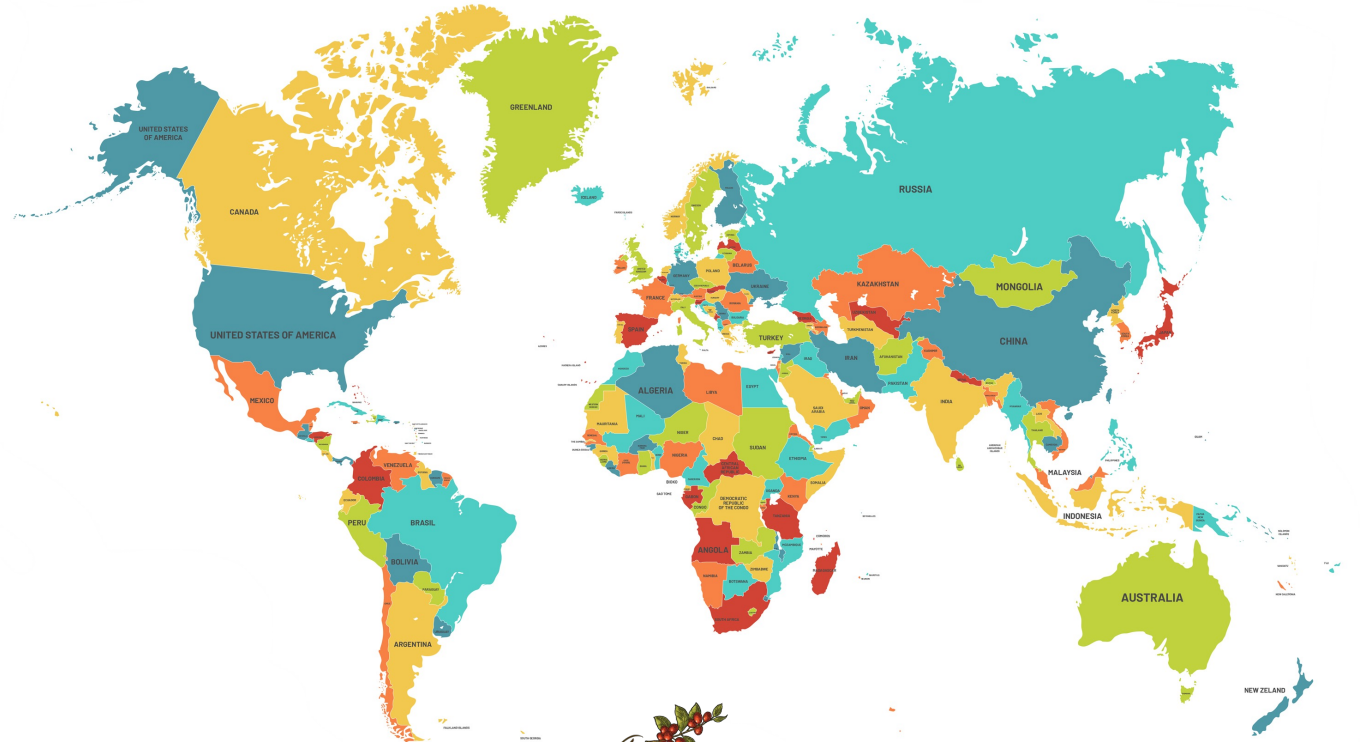

While we like to think of ourselves as experts, we know that nothing is ever perfect on the first try. Our process is engineered to encourage formulations, reformulations and products adjustments until our clients are 100% happy with their product.

MATERIAL SOURCING

JJM sources materials and raw ingredients that you can feel good about.

Our dedicated team members are experts at procuring the ingredients and materials needed to both create and package your product in accordance with strict commercial regulations. We welcome the challenge of finding new sources to meet unique material standards. There's hardly anything that hasn't been thrown our way!

ARMENIA WITH 65 YEARS OF EXPERIENCE

lends its capability for the purposes of procuring JJM's raw materials when needed.

See page 14 for more about Armenia

BLENDING CAPABILITIES

JJM Packaging has 20,000 KG of daily blending capacity. We can blend and pack under the same roof and in some cases the same blending unit is what feeds the packaging machine – no need for multiple handling of the product.

V Blender designs are most often used for the dry blending of free-flowing solids. The material being blended in the unit can vary in bulk density and in percentage of the total mixture. During blending materials are constantly being split and intermixed as the shell rotates.

Average Blending Size: 500 kg

Paddle Blender designs assure a continual and complete mixing action, while preventing product build up and degradation. The blender consists of multiple paddles positioned to gently lift and fold powder into itself reducing the level of agitation exerted on the blended product.

Average Blending Size: 1,000 kg

PACKAGING SOLUTIONS

JJM can produce and fill 3- or 4-sided pouches, stand up or zipper pouches, valve pouches, barrier bags, K-Cups, stick packs, and many more.

With our combined expertise and state-of-the-art packaging equipment, there's nothing we can't handle.

- K-Cups
- Sachets
- Pouches
- Secondary Packaging
- Stick Packs

SACHET CAPABILITIES

RA JONES POUCH KING

75 Packets Per Minute

**75,000 PACKETS
PER DAY**

NEW RA JONES POUCH KING

4.0" Wide Sachets:
800 Packets Per Minute

**800,000 PACKETS
PER DAY**

PRODUCT DEVELOPMENT

Double Chamber K-Cup

JJM has a patent pending technology designed to utilize a K-Cup as vehicle to deliver ingredients aimed at health and wellness. This technology lends itself to adding any soluble ingredient to a standard ground coffee K-Cup. Given people's routine connection with coffee, we believe that this vehicle is perfect for delivering many of the wellness ingredients that need to be consumed on a regular basis to show real efficacy i.e., **hydration, immune, sleep, and greens**. We could source and blend the ingredients needed for these healthy lifestyle support products but more importantly have a broad scope of packaging technologies that allows you to choose the package size and type that best suits each product – stick packs, large and small sachets, bulk fill pouches, etc.

Double Chamber K-Cup

Technology

- Allows for real ground coffee + creamer and/or sugar, flavoring, vitamins and minerals all in the same K-Cup.
- Precise individual dosing of coffee and added ingredient mix.

NEW INNOVATION:

Creamer, supplements, and flavoring powders placed in the lower chamber dissolve into freshly brewed coffee as they pass through.

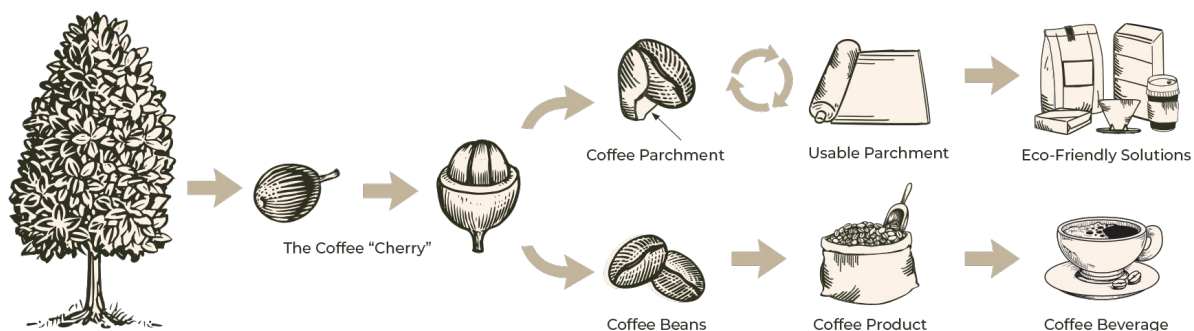

JJM's patent pending Double Chamber K-Cup

PACKAGING INNOVATION

Through years of research and testing, Bloom Fibers has created sustainable fiber produced from coffee parchment - a waste product of the coffee supply chain. We at Bloom have identified multiple industries that can use our fiber, **but the possibilities are endless.**

- Pouch & Sachet Film
- Single Dose Stick Pack
- Stand-Up Coffee Bags
- Coffee Filters
- Cartons
- Coffee Cups & Cup Sleeves

NEW COMPANY = NEW TECHNOLOGY = HIGH SPEED AND RELIABLE MACHINES

Founded in 2018, JJM owns and operates multiple high-speed, modern packaging lines. Just as the technology in our cell phones is evolving at an ever-accelerating rate, the same can be said for packaging machinery. With the evolution of packaging technology coupled with our staff's dedication, knowledge, and expertise; JJM has proven to be innovative from the start.

Our ownership and staff understands today's market and helps start-up brands take on the task of bringing a new product to the market.

Private Label Coffee Roasters

At Regal Commodities, our goal is to deliver to our clients the best roasted coffee that our expertise can produce. Leveraging our coffee expertise, we are prepared to work with you to develop that signature blend that sets you apart.

The management at Regal has 100+ years of experience in sourcing, trading, hedging, importing and roasting coffee. Regal supplies coffee to an elite group of quality conscious food service and retail consumers.

Regal operates in a facility that blends old world expertise with ultra modern standards. Retail, wholesale, food service, and many configurations of ground roast, flavored and freeze-dried coffee are our purview. Our roasting capability is currently in excess of 30 million pounds per annum.

ARMENIA'S HISTORY

Armenia Coffee Corporation was founded by Joe Apuzzo Sr. in 1956 and has since been one of the premier green coffee importers in the world. Currently owned and operated by Joseph Apuzzo Jr. Armenia has over 200 years of combined experience in sourcing green coffees in Central and South America, Africa, and Asia.

In an industry in which success hinges on the level and quality of service, the Armenia team understands that a strict commitment to the needs of our clients is imperative. For over 65 years Armenia has maintained an impeccable reputation for standing behind the quality of the product that it delivers, which goes far beyond the coffee itself.
