

## JJM Mission Statement

The evolution of the manufacturing process is what drives our organization. We do not sell a physical product; our team; our process, is our product. Our operation is built to adapt and react to the challenges and opportunities that we are presented with on a daily basis. It is the reaction of each component of our organization to view every hurdle as an opportunity that promotes the efficient, adaptable manufacturing engine that JJM has become.

### CONTRACT PACKAGING AND INNOVATION

#### AFFILIATED COMPANIES

Established in 1956, Armenia Coffee Corporation has solidified its reputation in the industry as one of the premier green coffee importers. Armenia takes pride in its ability to connect producers and exporters of green, soluble, and decaffeinated coffees with roasters all around the world.

**BLOOM FIBERS**  
organic material innovation

Bloom Fibers is a materials innovation company on a mission to fix a giant waste problem plaguing the coffee supply chain by giving coffee waste a second life. We make it easier for companies and individuals to reduce their carbon footprints one bean at a time.

# WHAT WE OFFER

## JJM Packaging LLC offers a turnkey solution.

Specializing in flexible package forming and powder filling, JJM is on the cutting-edge of the packaging industry. **Simply put, we are passionate about packaging.**

We're dedicated to providing you with a full-service packaging solution that exceeds your expectations, from our new product formulation capabilities, and state-of-the-art processing equipment to extensive product knowledge, and commitment to responsible manufacturing.

## FORMULATING

We have the knowledge, experience, and capability to optimize formulation not only for taste and functionality but, also manufacturability.

After spending time learning about your product, we begin the process of researching and contacting suppliers to find exactly what you need.

While we like to think of ourselves as experts, we know that nothing is ever perfect on the first try. Our process is engineered to encourage formulations, reformulations and products adjustments until our clients are 100% happy with their product.

## MATERIAL SOURCING

JJM sources materials and raw ingredients that you can feel good about.

Our dedicated team members are experts at procuring the ingredients and materials needed to both create and package your product in accordance with strict commercial regulations. We welcome the challenge of finding new sources to meet unique material standards. There's hardly anything that hasn't been thrown our way!

Armenia Coffee Corporation has 65 years of experience and lends its capability for the purposes of procuring JJM's raw materials when needed.

## BLENDING

JJM Packaging has 20,000 KG of daily blending.

We can blend and pack under the same roof and in some cases the same blending unit is what feeds the packaging machine – no need for multiple handling of the product. The capability of our blending systems allow us to streamline and limit the number of manufacturing operations required to go from raw material to finish product.

## QUALITY ASSURANCE

We have the ability to inspect for contaminants with accuracy.

JJM Packaging's system utilizes an x-ray detection system to determine the possible presence of contaminants.

We also use a systematic process to determine whether your product meets all the specified requirements. This prevents mistakes and defects in manufactured products and avoids problems when delivering products.

## WE ARE PLEASED TO BE CERTIFIED.

## SECONDARY PACKAGING SERVICES

The best secondary packaging will ensure your products are safely handled and transported and presented professionally for the end customer.

### BRANDING AND DISPLAY

Packaging presentation plays a key role in your product marketing strategy, especially for products headed for display shelves. We will work with you to design eye-catching secondary packaging that represents your brand.

### LOGISTICS

Grouping products together in secondary packaging makes handling, transport, and storage much simpler. Our secondary packaging can contain relatively large volumes of primary packaged products and transport the products to their final destination safely in their original condition.

## PRIMARY PACKAGING SERVICES

JJM streamlines the packaging process with our design, contract packaging and assembly capabilities.

- Powder Blending
- Contract Packaging
- Raw Material Sourcing
